

Task 9.2: finalizing your HD task

Overview:

If you are doing **7.3 HD task**, then you need to complete this task. Otherwise, you don't need to complete this task.

In this assessment, you need to provide a video of your developed intelligent system and elaborate how it works.

This task will help you to elaborate and show different features of your system using AI.

Submission the following files to Unit site :

For this task you need to prepare and record a video on how your intelligent system works. You can treat this video as a showcase about your work. You can upload your video on Unit Site, Discussion session, week 9 discussion area.

You need to talk about:

- What is your developed intelligent system? It's good to provide a diagram for your system.
- What are the features of this system?
- What are the benefits of this system?
- What sort of AI models you used and how they are integrated together to build this system?

The focus of this task is on demonstrating your capability to present your work and understand how to integrate AI techniques to build an intelligent system.
